SUMMARY

CompTIA Security+ certified cybersecurity professional with advanced data science experience, transitioning into security operations with specialized training in threat intelligence, SOC analysis, and incident response.

Proven ability to apply a rigorous analytical and investigative mindset to detect, analyze, and mitigate cyber threats across complex environments.

Skilled at translating technical security findings into clear, actionable insights for executive and cross-functional stakeholders.

Continuously developing expertise in cybersecurity tools, with hands-on exposure to SIEM platforms, network security fundamentals, and the MITRE ATT&CK framework

EXPERIENCE

Montgomery College – TechMAP Program

Rockville, MD

Cybersecurity Fellow

February 2026 – April 2026

- Earned CompTIA Security+ certification through hands-on training in network security, threat management, cryptography, access control, and risk mitigation.
- Conducted vulnerability assessments and analyzed TCP/IP traffic, protocol behavior, and layered defense concepts to identify exploitable weaknesses.
- Investigated phishing, spoofing, session hijacking, and man-in-the-middle attack scenarios while documenting indicators of compromise and remediation actions.

BCR Cyber

Baltimore, MD

Cybersecurity Fellow

August 2025 – September 2025

- Earned SOC Operations Analyst I certification through training in threat detection, incident response, and SOC investigation workflows.
- Monitored Splunk SIEM dashboards, analyzed log activity, performed alert triage, and identified simulated adversary behavior in cyber range environments.
- Mapped threat actor TTPs to MITRE ATT&CK and documented investigative findings and remediation recommendations.

University of Maryland Global Campus

Adelphi, MD

Cybersecurity Trainee

September 2024 – May 2025

- Completed a rigorous cybersecurity bootcamp by building applied knowledge across host-based security, network security, IAM, cryptography, security testing, operations, and application security.
- Strengthened practical security analysis skills by completing labs with Nmap, Wireshark, Kali Linux, Metasploit, Autopsy, OpenVAS, and GoPhish across attack and defense scenarios.
- Executed 5-step penetration test capstone by applying ethical hacking methods to a simulated enterprise environment and documenting findings with remediation recommendations.
- Applied Zero Trust and IAM governance concepts by evaluating access control principles, identity protection methods, and Microsoft SC-900 aligned security fundamentals.
- Advanced threat detection knowledge by using AI-driven techniques for incident response, malware analysis, predictive security analytics, and NLP-based cybersecurity use cases.
- Built SOC and incident response readiness by practicing log review, vulnerability testing, attack path analysis, security documentation, and structured remediation planning.

Catholic Relief Services

Baltimore, MD

Data Scientist

January 2018 – October 2024

- Increased productivity by 24%, reduced processing time by 20%, and improved data quality by 18% by architecting machine learning models, AI-driven data pipelines, preprocessing workflows, and model optimization techniques.
- Supported \$200M+ in revenue achievement by translating complex data findings into executive-ready reports, dashboards, and actionable recommendations for C-suite and cross-functional stakeholders.
- Strengthened data governance, privacy compliance, and secure data handling by establishing ethical AI practices, quality assurance standards, PII protocols, and audit trails across enterprise systems.

- Detected anomalous patterns, irregular activity, and operational risk signals by applying statistical modeling, Python, SQL, investigative analytics, and large-scale data analysis across complex datasets.
- Advanced automated intelligence reporting across 5+ teams by developing AI solutions for pattern detection, sentiment analysis, interactive dashboards, data collection workflows, and executive decision support.

EDUCATION

Syracuse University

Syracuse, NY

Master of Science (MS), Applied Data Science

Universidad Popular Autonoma del Estado de Puebla, Mexico

Puebla, Mexico

Bachelor of Science (BS), International Business

CERTIFICATIONS

CompTIA Security+

April 2026

Cybersecurity Practitioner Certification, Montgomery College

April 2026

SOC Operations Analyst (SOCOA I), BCR Cyber

November 2025

Industrial Control Systems Security, The University of Texas at San Antonio

August 2025

Malware Discovery and Investigation, The University of Texas at San Antonio

May 2025

Cybersecurity Bootcamp, Maryland University

May 2025

Digital Forensic Analysis, The University of Texas at San Antonio

March 2025

SKILLS

Security Monitoring & SIEM: Splunk, ELK Stack, Log Analysis, Alert Triage, SIEM Dashboards

Network Security & Testing: Wireshark, Nmap, TCP/IP Protocols, SSL/TLS, IPsec, OpenVAS

Offensive Security & Investigation: Kali Linux, Metasploit, Autopsy, YARA, GoPhish, Nessus

Programming & Data Analytics: Python, SQL, R, Statistical Modeling, Data Analysis, Machine Learning, AI-Driven Data Pipelines, NLP

Security Frameworks & Concepts: MITRE ATT&CK, NIST CSF, CIA Triad, Zero Trust, IAM Governance, Microsoft Security, Compliance & Identity Fundamentals

Languages: Spanish
